

Caring For Our Environment

At Capricorn Dinosaur Park Yeppoon, we are committed to protecting the natural environment and continually improving the way we use resources.

Through sustainable practices and responsible tourism, we aim to minimise our environmental impact while providing an enjoyable experience for every visitor.

Our Commitment

To reduce our reliance on non-renewable energy, we have installed a 20kW solar power system consisting of 42×475W solar panels, supported by a 20kW battery storage system.

We also recycle cardboard and eligible drink containers to reduce waste and encourage responsible resource management.

As part of our commitment to ethical tourism, we do not sell merchandise made from rare or threatened species, heritage artefacts, or items of significant cultural importance. We encourage our visitors to make informed purchasing choices and avoid buying these products from other sources.

How You Can Help

Every visitor plays an important role in protecting the unique environment of Capricorn Dinosaur Park. We encourage you to:

- Stay on designated walking tracks and raised boardwalks to protect fragile vegetation, reduce soil erosion, and minimise disturbance to wildlife habitats.
- Observe wildlife from a respectful distance. Please do not approach, feed, or chase native animals, as this can affect their health and natural behaviours.
- Leave no trace by placing rubbish in the bins provided or taking it with you.
- Leave natural areas as you find them. Please do not pick plants or remove natural items such as rocks, shells, timber, or other natural materials, as they provide important habitat for native wildlife.

Together, these simple actions help preserve our natural environment for future generations to enjoy.

Acknowledgement of Country

Capricorn Dinosaur Park acknowledges the Traditional Custodians of the land on which we operate. We pay our respects to Elders past and present and recognise the continuing connection of Aboriginal and Torres Strait Islander peoples to Country, culture, and community throughout the Capricorn Region.
